

Position Announcement
“DATA Development Engineer”

04th June 2024

Position Description:

“Material Insights” in Amman/Jordan is seeking to fill an open full-time position for a “Data Development Engineer”. The position specifically targets fresh graduates or senior undergraduate students approaching graduation. The general framework for this position is the “development & implementation of specialized software tools to generate, process, compile and manage material DATA”. Prior experience in these areas is NOT essential nor expected. While certain fundamental skills are required, we focus on the candidate’s readiness to be immersed in a fully applied environment, the drive towards learning in a multi-disciplinary domain, and adaptability to the highly dynamic nature of a startup!

Requirements:

- **Degree:** Major in Mechanical Engineering, Materials Engineering, Industrial Engineering, or any related fields.
- **Prior Work Experience:** Not Required! Distinguishing candidates will be based on (i) the ability to demonstrate your knowledge & skill set via a “portfolio” and (ii) the attitude towards learning new skills & immersing yourself in areas outside your comfort zone.
- **Must Demonstrate:**
 - Strong technical background within the discipline (your GPA must be over 2.9)
 - Basic knowledge & familiarity with some programming languages (such as Python, C++, etc.)
 - Strong communication skills in English, both written and spoken (interview process)
 - Drive for quality & attention to detail (you will be asked to provide a presentation for at least one project)
- **Nice to Have:** any additional evidence of working with coding languages.
- **Other:** This position requires flexibility to learn new programming languages and software tools in the future.

What we Offer:

- A dynamic development-oriented environment that guarantees exposure to a wide array of responsibilities, while encouraging innovation, creativity, and continuous learning!
- Egalitarian office atmosphere with no bureaucracies or hierarchies, providing you with the opportunity to develop technically, professionally, and personally!

How to Apply:

Interested candidates are kindly asked to fill the form using this link:
